

## Extract from Calmwater Fishing Charters Newsletter

Yes I know this fishing report is long overdue. But before I get into that let me just tell you about our new boat.

We've had it now for a couple of months and it has exceeded all expectations. It's big, roomy, extremely soft riding, dry and most of all stable and has a toilet on board. It has absolutely the state of the art electronics and is rigged to the absolute hilt. I'm so glad I went with Spacecraft, they really are the best aluminium boat builders in Australia. The twin 140hp Suzuki 4 strokes have proven to be quite the smooth and relatively vibration-free. She really is an incredible package. The beauty with this vessel is that not only will it not only provide greater shelter and more comfort for you, but it will allow us to fish the outside waters if you desire. The primary for big jewies is definitely are in the rivers and in the Broken Bay system but if people want to run offshore and chase snapper or any other reef fish, as well as sharks, yellowfin tuna and marlin, this boat is ready for it. If you wish we can do both, say hit the jewies first in the morning and then head offshore and chase a few snapper or marlin. If you wish to stay in the calm water we can do it at a greater level of comfort than what you may have experienced in the past. In the last month we have replaced all our fishing tackle as well with state of the art Shimano gear. From tiny Stradics to 50W Tiagaras on Ian Miller rods and everything in-between, we've got the lot. State of the art bait and tackle is definitely the case here.

Here is a picture of our new vessel, as you see we have had a colour change and no sign writing on the vessel. The idea of this is to draw less attention while out on the water, which I think will be a good thing. Hope you are well and if you are heading out on your own vessels in the near future feel free to give me a call and I'll update you on what's happening in the Broken Bay area at that time.

Kind Regards  
Greg and Shannon Joyes
